

# Product and Risk Description

## Purpose

This document provides you with key information about this product. The information is intended to help you understand the nature, risks, costs, potential gains and losses of this product.

## Summary

<b>Product name</b>	Securities finance
<b>Issuer of this document</b>	Nordea Bank Abp (hereafter "Nordea")
<b>Regulated by</b>	Finnish Financial Supervisory Authority
<b>Produced</b>	01.12.23

## What is this product?

### Description

Securities finance is a loan that is traded under a bilateral master agreement and enables the customer to obtain financing by using listed securities as collateral. The customers receive cash and posts collateral such as equities, investment grade bonds or cash with Nordea. The collateral is transferred as a transfer of title which means that the legal ownership of the securities posted is transferred from the customer to Nordea. This implies that the customer may be forced to flag for a reduction in holding and will not be able to attend the annual or an extraordinary general meeting (AGM/EGM) while the securities are placed as collateral. In order to attend the AGM/EGM the securities must be recalled in due time for Nordea to return them. Nordea will pay manufactured dividends and/or coupons on the posted collateral. The collateral value must at all times be equal to at least 100% of the loan, adjusted by a haircut (in percent) agreed between the two parties. The loans are margined on a day-today basis by adjusting the collateral according to the terms agreed.

In case the customer fails to post additional collateral for the margin call, Nordea may be forced to liquidate the collateral to cover the lost payment of margin calls. The transaction can either have a fixed maturity or be traded on an open basis where either party can terminate the transaction according to predefined clauses. At the date of maturity both parties must reverse their commitments. The cash lent will always be repaid with interest. The interest rate will either be a fixed or floating rate and payable monthly via an invoice. Terms will be negotiated between Nordea and the customer. Legally the trade is subject to the terms and clauses of the Global Master Securities Lending Agreement (GMSLA) which specifies the obligations between the two trading counterparties.

### Intended investor

The product Securities finance is aimed at professional clients and eligible counterparties. The Securities finance is a product for .\*

## What are the risks and what could I get in return?

The risk and profit/loss descriptions relate to this product only.

If this product is combined with other products or commercial positions, the total portfolio will have a significantly different profile than the one for this product alone.

### Market risk

The market risk associated with a securities finance transaction consists of potentially large fluctuations in the value of the posted collateral. A negative change in the value will force the customer to post more collateral to keep the existing cash position.

The posted collateral value will be directly affected by a failure of the underlying issuer to pay its obligation to the market. The customer can alternatively eliminate such a demand for additional collateral by reducing the exposure.

If the cash on loan and the collateral are denominated in different currencies, the trade includes currency risk. A strengthening of the cash currency against the currency of the collateral placed will imply a margin call since the collateral will be relatively lower valued. The product involves interest rate risk since the cash loan is repaid with interest.

### Counterparty credit risk

A securities finance transaction contains credit risk exposure for the customer since the collateral value is adjusted by a haircut; this means that the value of the posted collateral exceeds that of the cash loan. Credit risk is any credit event that occurs preventing either party from paying back its obligations under the contract. In case of a Nordea default, it may not be possible to return the collateral placed.

Market Parameters	Securities finance	
	Influence on market value when increasing	Influence on market value when decreasing

## What happens if Nordea Bank Abp is unable to pay out?

You are exposed to the risk that the issuer of this product or the counterparty (which may be Nordea), as applicable, might be unable to fulfil its obligations in respect of the product e.g. in the event of insolvency, an administrative order or bail-in.

## What are the costs?

The total costs take into account one-off, on-going, transaction, ancillary and incidental costs.

They include potential early exit penalties. The figures assume you invest 100,000 EUR nominal. The figures are estimates and may change in the future.

The costs charge for the investment is dependent on the risks associated with the transaction and the term of the investment. We may include additional costs and charges on a case by case basis. If so, Nordea will provide you with information about these costs and charges prior to the point of sale, and will explain the impact that these costs will have on your investment over time.

Investment (based on above nominal)	Cumulative Costs
Combined cost to buy and exit the product	1000
% p.a. of nominal	1.0
