Summary

Product name	CDO in derivative format
Issuer of this document	Nordea Bank Abp (hereafter "Nordea")
Regulated by	Finnish Financial Supervisory Authority
Produced	03.10.20

What is this product?

Description

This product is a financial instrument in the form of a derivative.

The return is linked to the credit losses in an underlying basket. The derivative may pay a fixed coupon, a floating coupon or a target redemption amount calculated on the notional amount.

If the losses in the underlying portfolio do not go above the attachment point, the protection seller pay no tranche losses to the protection buyer.

The credit losses in the investment are dependent on the number of credit events in the underlying basket during the observation period. If specified in the terms, the credit losses of the investment may also depend on the market recovery rate associated with each credit event. Bankruptcy, failure to pay, restructuring and governmental intervention are examples that could constitute a credit event.

If a credit event occurs in the underlying basket during the observation period, each credit event may decrease the nominal amount. The product has an attachment point and a detachment point which is specified in the terms. Attachment and detachment points are expressed as a percentage points of the notional. If losses in the underlying basket go above the attachment point the return of the investment (as seen from protection seller) is reduced, and if losses are above the detachment point the protection seller have to pay the entire tranche notional amount.

The specific amount for any one credit event may thus vary and depend on how many credit events that has previously occurred.

Intended investor

The product CDO in derivative format is aimed at professional clients and eligible counterparties, who are interested in capital growth, hedging, leveraged participation and income. The CDO in derivative format is a product for informed investors and advanced investors.*

What are the risks and what could I get in return?

If this product is combined with other products or commercial positions, the total portfolio will have a significantly different profile than the one for this product alone. The NPV of a CDO tranche is exposed to changes in the market rate of interest. The NPV of the sold protection decreases if the market rate of interest increases and vice versa. Changes in the tranche spread will impact the market value of a CDO tranche. The tranche spread or upfront is normally a function of the tranche spread / upfronts of other tranches in the capital structure and the spread / upfront of the underlying pool of CDS. This tranche spread may change due to changes in index or single name CDS spreads, time, risk free discount rates, default correlation and dispersion, credit events, and recovery rates. A change in the creditworthiness of Nordea or client will additionally affect the CVA value of the NPV.

Market Parameters	CDO in derivative format	
	Influence on market value when increasing	Influence on market value when decreasing
Credit Spreads	-	+
Market Rate of Interest	-	+

What happens if Nordea Bank Abp is unable to pay out?

You are exposed to the risk that the issuer of this product or the counterparty (which may be Nordea), as applicable, might be unable to fulfil its obligations in respect of the product e.g. in the event of insolvency, an administrative order or bail-in. The product is not covered by any deposit protection scheme. Thus, you could lose the entire amount invested.

What are the costs?

The total costs take into account one-off, on-going, transaction, ancillary and incidental costs.

They include potential early exit penalties. The figures assume you invest 100,000 EUR nominal. The figures are estimates and may change in the future.

The costs charge for the investment is dependent on the risks associated with the transaction and the term of the investment.

* Informed investors have average knowledge of relevant financial products and/or some financial industry experience. Advanced investors have good knowledge of relevant financial products and transactions, and/or financial industry experience or accompanied by professional investment advice or included in a discretionary portfolio service.

We may include additional costs and charges on a case by case basis. If so, Nordea will provide you with information about these costs and charges prior to the point of sale, and will explain the impact that these costs will have on your investment over time.

Investment (based on above nominal)	Cumulative Costs
Combined cost to buy and exit the product	0
% p.a. of nominal	0 - 2.0 per annum
