## Summary

<b>Product name</b>	Linear Credit Linked Note
<b>Issuer of this document</b>	Nordea Bank Abp (hereafter "Nordea")
<b>Regulated by</b>	Finnish Financial Supervisory Authority
<b>Produced</b>	01.10.20

## What is this product?

### Description

This product is a financial instrument in the form of a bond. The return is linked to the number of credit events in a basket. The note may pay a fixed coupon, a floating coupon or a target redemption amount calculated on the notional amount. If there has not occurred credit events, the notional amount is paid to the investor at maturity. The return of the investment depends on the number of credit events in the underlying assets during the observation period. In some cases the return also depends on the market recovery rate associated with each credit event. Bankruptcy, failure to pay, restructuring and governmental intervention are examples that could constitute a credit event. If a credit event occurs in the underlying assets during the observation period, each credit event will decrease the nominal amount.

### Intended investor

The product Linear Credit Linked Note is aimed at professional clients and eligible counterparties, who are interested in capital growth, hedging, leveraged participation and income. The Linear Credit Linked Note is a product for informed investors and advanced investors.\*

## What are the risks and what could I get in return?

The risk and profit/loss descriptions relate to this product only.

If this product is combined with other products or commercial positions, the total portfolio will have a significantly different profile than the one for this product alone.

The market value of a Linear Credit Linked Note (the "Note") is exposed to changes in the market rate of interest. The market value of the Note decreases if the market rate of interest increases and vice versa. Changes in the credit spread will impact the market value of a Note. The credit spread is normally given as the difference between the discount rate for a risky credit bond and a non-risky (e.g. government) bond. This credit spread may change either due to changing market perceptions of the issuer, or a general change of the spread level in the market to which the bond belongs (e.g. corporates, municipalities etc.).

A change in the perceived creditworthiness of the issuer will affect the value of the bond. A fall in perceived creditworthiness will lead to a lower price on the bond.

The investor assumes the full credit risk of the issuer, and in case of issuer default the investor may lose all or a part of his investment and/or the repayment may be delayed.

The market value of a Note is exposed to the market parameters listed in the matrix below.

Market Parameters	Linear Credit Linked Note	
	Influence on market value when increasing	Influence on market value when decreasing
Credit Spreads	-	+
Market Rate of Interest	-	+

## What happens if Nordea Bank Abp is unable to pay out?

You are exposed to the risk that the issuer of this product or the counterparty (which may be Nordea), as applicable, might be unable to fulfil its obligations in respect of the product e.g. in the event of insolvency, an administrative order or bail-in. The product is not covered by any deposit protection scheme. Thus, you could lose the entire amount invested.

## What are the costs?

The total costs take into account one-off, on-going, transaction, ancillary and incidental costs.

They include potential early exit penalties. The figures assume you invest 100,000 EUR nominal. The figures are estimates and may change in the future.

The costs charge for the investment is dependent on the risks associated with the transaction and the term of the investment.

We may include additional costs and charges on a case by case basis. If so, Nordea will provide you with information about these costs and charges prior to the point of sale, and will explain the impact that these costs will have on your investment over time.

\* Informed investors have average knowledge of relevant financial products and/or some financial industry experience. Advanced investors have good knowledge of relevant financial products and transactions, and/or financial industry experience or accompanied by professional investment advice or included in a discretionary portfolio service.
