<b>Issuer of this document</b>	Nordea Bank Abp (hereafter "Nordea")
<b>Regulated by</b>	Finnish Financial Supervisory Authority
<b>Produced</b>	21.09.20

## What is this product?

### Description

An equity down and in put (DIP) is an agreement between two parties giving the buyer (the holder) has the right to receive a payout which is the greater of zero and the difference between the agreed strike price and the basket return on a specified future date (expiry date) if the basket return at any agreed observation date has been below predefined barrier level. Barrier level will always be below strike level for the option.

The payout is cash settled at a specified maturity date after the expiry date.

The underlying instruments in the basket can be shares in specific companies or equity indices. The weight of each underlying instrument is specified as a percentage of the basket notional.

The payout will be in the same currency as the basket notional, which can be different from the denomination currencies of the underlying shares or equity indices. The basket return is calculated as the performance of the arithmetic means of the reference prices of the underlying instruments on specified observation dates.

The agreement is binding for the seller of the option. It may be possible to terminate the transaction before maturity. As the market value of the transaction may have changed since it was initiated, an early termination will usually involve the initial seller paying the present market value to the buyer.

A DIP is a non-standardised product where trade details like time to maturity and the chosen strike price of the option will be individually agreed. Non-standardised options are traded and settled through the broker issuing the option. The options will adhere to the rules set out by ISDA.

### Intended investor

The product Equity Down and In Quanto Basket Put Option EU (Buy) is aimed at professional clients and eligible counterparties, who are interested in capital growth, hedging, leveraged participation and income. The Equity Down and In Quanto Basket Put Option EU (Buy) is a product for informed investors and advanced investors.\*

## What are the risks and what could I get in return?

The risk and profit loss descriptions relate to this product only.

If this product is combined with other products or commercial positions, the total portfolio will have a significantly different profile than the one for this product alone.

As the non-standardised option is not listed on a stock exchange or similar authorised market, the liquidity will be lower than for a listed option, which can make pricing less efficient.

When buying an option the loss is limited to the paid premium, whereas the potential for a profit is unlimited. When selling an option the potential profit is limited to the premium received, while the risk of a loss is unlimited.

The market value of a DIP is exposed to the forward price of the underlying instruments, the time to expiry, the implied volatility and the correlation between the underlying instruments.

A bought DIP is exposed to the market parameters listed in the matrices below.

Equity Down and In Quanto Basket Put Option EU (Buy)		
Market Parameters	Influence on market value when increasing	Influence on market value when decreasing
Not applicable	Not applicable	Not applicable

## What happens if Nordea Bank Abp is unable to pay out?

You are exposed to the risk that the issuer of this product or the counterparty (which may be Nordea), as applicable, might be unable to fulfil its obligations in respect of the product e.g. in the event of insolvency, an administrative order or bail-in. The product is not covered by any deposit protection scheme. Thus, you could lose the entire amount invested.

## What are the costs?

The total costs take into account one-off, on-going, transaction, ancillary and incidental costs.

\* Informed investors have average knowledge of relevant financial products and/or some financial industry experience. Advanced investors have good knowledge of relevant financial products and transactions, and/or financial industry experience or accompanied by professional investment advice or included in a discretionary portfolio service.

They include potential early exit penalties. The figures assume you invest 100,000 EUR nominal. The figures are estimates and may change in the future.

The costs charge for the investment is dependent on the risks associated with the transaction and the term of the investment. We may include additional costs and charges on a case by case basis. If so, Nordea will provide you with information about these costs and charges prior to the point of sale, and will explain the impact that these costs will have on your investment over time.

Investment (based on above nominal)	Cumulative Costs
Combined cost to buy and exit the product	0
% p.a. of nominal	0
