<b>Product name</b>	Equity Dividend Swap
<b>Issuer of this document</b>	Nordea Bank Abp (hereafter "Nordea")
<b>Regulated by</b>	Finnish Financial Supervisory Authority
<b>Produced</b>	19.05.2020

## What is this product?

### Description

An equity dividend swap is an agreement between two parties to pay (receive) an agreed dividend at a fixed price against receiving (paying) the actual realised dividend on a specified equity or index over a specified period.

The notional amount of the swap is not exchanged but is used solely to calculate the payments of the swap. These cash flows are exchanged periodically (ie monthly, quarterly) or at maturity.

The price is subject to change until the transaction is agreed upon.

The agreed transaction is mutually binding until maturity and cannot be cancelled. However, it may be possible to terminate the transaction before maturity. As the market value of the transaction may have changed, a nearly termination will usually involve a payment of the present market value from one party to the other.

Equity dividend swaps are non-standardised products where trade details are individually agreed.

### Intended investor

The product Equity Dividend Swap is aimed at professional clients and eligible counterparties, who are interested in capital growth, hedging, leveraged participation and income. The Equity Dividend Swap is a product for informed investors and advanced investors.\* The intended retail investor has a medium risk tolerance.

## What are the risks and what could I get in return?

### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products with a similar risk profile sold by Nordea. It shows that the potential risks that the product will lose money because of movements in the markets or because the issuer of this product or the counterparty (which may be Nordea), as applicable, is not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

The risk and profit/loss descriptions relate to this product only.

If this product is combined with other products or commercial positions, the total portfolio will have a significantly different profile than the one for this product alone.

An equity dividend swap is exposed to changes in the quoted dividend price.

For the payer (receiver) of the fixed price an increase in the quoted dividend price will increase (reduce) the market value of the equity dividend swap and vice versa.

Equity Dividend Swap		
Market Parameters	Influence on market value when increasing	Influence on market value when decreasing

## What happens if Nordea Bank Abp [LEI: 529900ODI3047E2LIV03] is unable to pay out?

You are exposed to the risk that the issuer of this product or the counterparty (which may be Nordea), as applicable, might be unable to fulfil its obligations in respect of the product e.g. in the event of insolvency, an administrative order or bail-in. The product is not covered by any deposit protection scheme. Thus, you could lose the entire amount invested.

\* Informed investors have average knowledge of relevant financial products and/or some financial industry experience. Advanced investors have good knowledge of relevant financial products and transactions, and/or financial industry experience or accompanied by professional investment advice or included in a discretionary portfolio service.

## What are the costs?

The total costs take into account one-off, on-going, transaction, ancillary and incidental costs.

They include potential early exit penalties. The figures assume you invest 100,000 EUR nominal. The figures are estimates and may change in the future.

The costs charge for the investment is dependent on the risks associated with the transaction and the term of the investment.

We may include additional costs and charges on a case by case basis. If so, Nordea will provide you with information about these costs and charges prior to the point of sale, and will explain the impact that these costs will have on your investment over time.

Investment (based on above nominal)	Cumulative Costs
Combined cost to buy and exit the product	0
% p.a. of nominal	0
