

Product and Risk Description

Purpose

This document provides you with key information about this product. The information is intended to help you understand the nature, risks, costs, potential gains and losses of this product.

Summary

Product name	Equity forward
Issuer of this document	Nordea Bank Abp (hereafter "Nordea")
Regulated by	Finnish Financial Supervisory Authority
Produced	16.09.20

What is this product?

Description

The equity forward is a non-standardized derivative contract traded over the counter (OTC), where Nordea and its client enter a contract of a purchase (sell) of a specified amount of equities at an agreed price (forward price) and at a specified future date (maturity). The market price at the time of maturity reflects whether the equity forward has realised a profit or a loss. If the client has agreed to purchase a forward contract then a higher (lower) market price than the forward price at maturity will realise a profit (loss). When the transaction is agreed upon the contract becomes mutually binding and the forward price becomes fixed. It may be possible to terminate the transaction before maturity, keep in mind the market value of the transaction may have changed and an early termination will involve a net payment of the present market value between Nordea and the client. At maturity the buyer of the forward contract will either receive/deliver a net cash amount (forward price – market price) or receive/deliver physical equities against the determined forward price.

The equity forward is regulated under the ISDA agreement.

Intended investor

The product Equity forward is aimed at professional clients and eligible counterparties, who are interested in hedging income. The Equity forward is a product for informed investors and advanced investors.*

What are the risks and what could I get in return?

The risk and profit loss descriptions relate to this specific product only.

If this product is combined with other products or commercial positions, the total portfolio will have a significantly different profile than the one for this product alone.

Market risk

The market value of a bought equity forward is exposed to changes in equity price, expected dividend and interest rates until maturity date. Thus an increase (decrease) in equity price or interest rates will lead to an increase (decrease) in the market value of the equity forward. On the opposite, an increase (decrease) in dividend leads to a decrease (increase) in the market value of the equity forward.

Counterparty Credit Risk

The forward contract contains a credit risk for both Nordea and the client. A credit risk is any credit event that occurs which prevent either party to fulfil its obligations stated in the contract. In the case of a Nordea default the contract will no longer be valid.

Market Parameters	Equity forward	
	Influence on market value when increasing	Influence on market value when decreasing
Share Price	+	-
Interest Rates	+	-
Dividend	-	+

What happens if Nordea Bank Abp is unable to pay out?

You are exposed to the risk that the issuer of this product or the counterparty (which may be Nordea), as applicable, might be unable to fulfil its obligations in respect of the product e.g. in the event of insolvency, an administrative order or bail-in. The product is not covered by any deposit protection scheme. Thus, you could lose the entire amount invested.

What are the costs?

The total costs take into account one-off, on-going, transaction, ancillary and incidental costs.

They include potential early exit penalties. The figures assume you invest 100,000 EUR nominal. The figures are estimates and may change in the future.

The costs charge for the investment is dependent on the risks associated with the transaction and the term of the investment.

We may include additional costs and charges on a case by case basis. If so, Nordea will provide you with information about these costs and charges prior to the point of sale, and will explain the impact that these costs will have on your investment over time.

* Informed investors have average knowledge of relevant financial products and/or some financial industry experience. Advanced investors have good knowledge of relevant financial products and transactions, and/or financial industry experience or accompanied by professional investment advice or included in a discretionary portfolio service.

Investment (based on above nominal)	Cumulative Costs
Combined cost to buy and exit the product	4400
% p.a. of nominal	4.4
