

Product and Risk Description

Purpose

This document provides you with key information about this product. The information is intended to help you understand the nature, risks, costs, potential gains and losses of this product.

Summary

Product name	Swedish CPI-linked Bonds
Issuer of this document	Nordea Bank Abp (hereafter "Nordea")
Regulated by	Finnish Financial Supervisory Authority
Produced	26.10.22

What is this product?

Description

A Swedish CPI-linked bond is a tradable debt instrument with a regular coupon payment. The bond is linked to the Swedish consumer price index (CPI), with an indexation lag of three months. Nominal amount and coupon payments increase in line with the consumer price index, which entails that the future cash flow will always keep its real purchasing power. Interest and inflation compensation for zero coupon bonds are paid at redemption.

Investments in Swedish CPI-linked bonds offer a way to benefit from or protect against accelerating Swedish inflation as an investor in Swedish CPI-linked bonds obtains a higher return, the higher Swedish inflation is.

At maturity the redemption may be protected at par, ie protected against the decline of the underlying CPI index during the lifetime of the bond.

The price is subject to change until the transaction is agreed upon.

Intended investor

The product Swedish CPI-linked Bonds is aimed at retail clients, professional clients and eligible counterparties, who are interested in capital growth and hedging, income and other investment objectives. The Swedish CPI-linked Bonds is a product for basic investors, informed investors and advanced investors.*

What are the risks and what could I get in return?

The risk and profit/loss descriptions relate to this product only.

If this product is combined with other products or commercial positions, the total portfolio will have a significantly different profile than the one for this product alone. The value of a Swedish CPI-linked bond is exposed to changes in the market rate of interest and actual inflation, ie the underlying consumer price index.

The value of the bond is also subject to changes in the market perception of the credit risk of the borrower. A fall in perceived creditworthiness will lead to a lower price on the bond.

The investor assumes the full credit risk of the issuer, and in case of issuer default the investor may lose all or a part of his investment and/or the repayment may be delayed.

The market value of a Swedish CPI-linked bond is exposed to the market parameters listed in the matrix below.

Market Parameters	Swedish CPI-linked Bonds	
	Influence on market value when increasing	Influence on market value when decreasing
Market rate of interest	-	+
Consumer price index	+	-

What happens if Nordea Bank Abp is unable to pay out?

You are exposed to the risk that the issuer of this product or the counterparty (which may be Nordea), as applicable, might be unable to fulfil its obligations in respect of the product e.g. in the event of insolvency, an administrative order or bail-in. The product is not covered by any deposit protection scheme. Thus, you could lose the entire amount invested.

What are the costs?

The total costs take into account one-off, on-going, transaction, ancillary and incidental costs.

They include potential early exit penalties. The figures assume you invest 100,000 EUR nominal. The figures are estimates and may change in the future.

The costs charge for the investment is dependent on the risks associated with the transaction and the term of the investment.

We may include additional costs and charges on a case by case basis. If so, Nordea will provide you with information about these costs and charges prior to the point of sale, and will explain the impact that these costs will have on your investment over time.

* Basic investors have basic knowledge of relevant financial instruments and/or with no financial industry experience. Informed investors have average knowledge of relevant financial products and/or some financial industry experience. Advanced investors have good knowledge of relevant financial products and transactions, and/or financial industry experience or accompanied by professional investment advice or included in a discretionary portfolio service.
