**You are about to purchase a product that is not simple and may be difficult to understand.**

## What is this product?

<b>Type</b>	This product is a derivative contract in the form of a swap relating to interest rates and currencies.
<b>Objectives</b>	<ul style="list-style-type: none"> <li>The objective of this product is to exchange floating interest payments in one currency (USD) against floating interest payments in another currency (EUR), and it is used to convert notional amounts in USD and EUR.</li> <li>The product achieves its objective by you and Nordea agreeing to the terms of the cross currency basis swap, under which you and Nordea agree to exchange notional amounts on the maturity date (and, in case this is agreed upon, on the start date) and you agree to pay Nordea a floating interest amount in EUR and Nordea agrees to pay you a floating interest amount in USD for an agreed period of time.</li> <li>If agreed, on the start date notional amounts in each currency, based on the then current spot rate, are exchanged. Notional amounts are always exchanged on the maturity date.</li> <li>Payments under a cross currency basis swap consist of interest payments and exchange of notional amounts on the maturity date (and, in the event this is agreed upon, on the start date).</li> <li>The floating interest amount in EUR is based on a floating interest reference rate that is determined in the beginning of each interest rate period. This floating interest amount is paid by you on pre-agreed payment dates and is calculated on the basis of the floating interest rate (plus, in the event this is agreed upon, a spread) multiplied with the notional amount and the day count fraction.</li> <li>The floating interest amount in USD is based on a floating interest reference rate that is determined in the beginning of each interest rate period. This floating interest amount is paid by Nordea on pre-agreed payment dates and is calculated on the basis of the floating interest rate (plus, in the event this is agreed upon, a spread) multiplied with the notional amount and the day count fraction.</li> <li>The Cross Currency Basis Swap is a bilateral agreement that cannot ordinarily be terminated unilaterally by either you or Nordea. It is a product that is entered into for its term, although early termination may occur in the event of a default of either you or Nordea. The agreement between you and Nordea provides that if certain exceptional events occur (1) Nordea may make adjustments to certain products and/or (2) Nordea or you may terminate the product early. These events are specified in more detail in the agreement between you and Nordea. The product may also be terminated upon mutual agreement. The amount (if any) you receive or pay on such early termination is likely to be different from the scenarios described in this document.</li> <li>Nordea and you may agree on an optional early termination for Nordea as part of the product terms. The optional early termination allows Nordea to terminate the product at specific dates prior to maturity for settlement at market value.</li> <li>You may not be able to terminate this product even though you or Nordea have terminated or discontinued a product or a commercial flow that this product is aimed to hedge.</li> <li>Illustrative terms are set out below, which are illustrative of the terms of a Cross Currency Basis Swap, but which do not reflect the exact terms you agree with Nordea. The exact terms will be set out in an individual trade confirmation.</li> </ul>

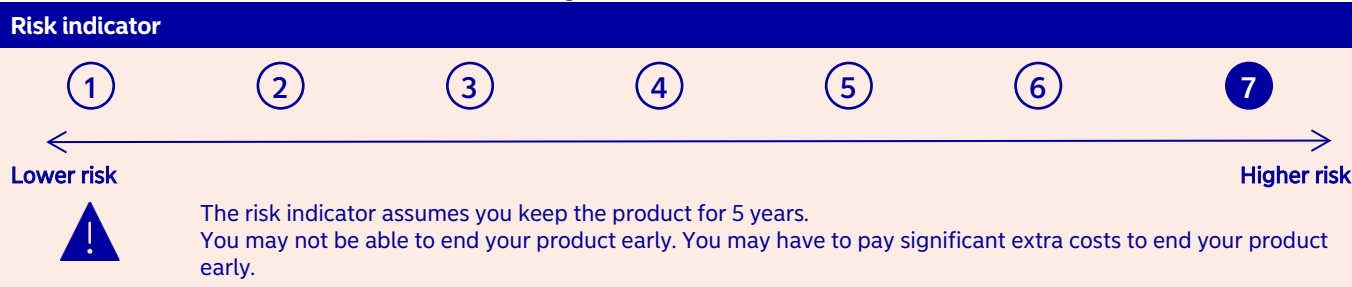

<b>Trade date</b>	03.01.18
<b>Start</b>	05.01.18
<b>Maturity</b>	05.01.23
<b>Nordea pays</b>	USD
<b>You pay</b>	EUR
<b>Amortisation</b>	Bullet
<b>Floating interest rate/Reference rate (USD)</b>	3-month USD-Libor
<b>Spread</b>	No spread
<b>Floating interest rate/Reference rate (EUR)</b>	3-month Euribor

Day count - floating rate (USD)	ACT 360
Day count - floating rate (EUR)	ACT 360

### Intended retail investor

The product Cross Currency Basis Swap is aimed at retail clients, who are interested in hedging and who have a medium-term investment horizon of between 3 and 5 years. The Cross Currency Basis Swap is a product for informed investors or advanced investors.\* The investor is able and willing to bear losses beyond the investment amount and puts no emphasis on capital protection. On a scale of risk ranging from 1 (very low risk tolerance; very low to low return) to 7 (very high risk tolerance; highest return) the product Cross Currency Basis Swap falls in risk category 7.

## What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance at a very high level, and poor market conditions are very unlikely to impact the capacity of Nordea Bank Abp to pay you.

When this product is combined with other products or commercial positions, the total portfolio will have a different net risk profile.

This product does not include any protection from future market performance so you could incur significant losses.

If we are not able to pay you what is owed, you could incur significant losses.

### Performance scenarios

Nominal amount 10 000 USD\*

Scenarios		1 year	3 years	5 years (Recommended holding period)
Stress scenario	What you might get back or pay after costs	7 859,11 USD	8 543,18 USD	8 006,07 USD
	Average return each year	-21,41 %	-5,11 %	-5,18 %
Unfavourable scenario	What you might get back or pay after costs	14 232,4 USD	13 058,56 USD	12 821,86 USD
	Average return each year	42,32 %	9,3 %	6,12 %
Moderate scenario	What you might get back or pay after costs	15 866,01 USD	15 982,41 USD	15 648,28 USD
	Average return each year	58,66 %	16,92 %	11,3 %
Favourable scenario	What you might get back or pay after costs	17 861,62 USD	18 875,83 USD	19 071,02 USD
	Average return each year	78,62 %	23,59 %	16,69 %

This table shows the money you could get back or pay over the next 5 years, under different scenarios, assuming that you invest 10 000 USD. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where Nordea Bank Abp is not able to pay you. This product cannot be easily ended. This means it is difficult to estimate how much you would get back if you end before maturity. You will either be unable to end early or you will have to pay high costs or make a large loss if you do so. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

\* The calculation is based on the notional of the contract (in this example 10 000 USD).

## What happens if Nordea Bank Abp is unable to pay out?

When buying the product you assume a credit risk on the issuer. In the event of the issuers bankruptcy, the holder of the product will have an unsecured claim versus the bank. Note that the product is not covered by any deposit guarantee scheme.

\* Informed investors have average knowledge of relevant financial products and/or some financial industry experience. Advanced investors have good knowledge of relevant financial products and transactions, and/or financial industry experience or accompanied by professional investment advice or included in a discretionary portfolio service.

## What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the performance of the product. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for the recommended holding period. They include potential early exit penalties. The figures assume you invest 10 000 USD. The figures are estimates and may change in the future.

### Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

#### Nominal amount 10 000 USD

#### If you end at the recommended holding period

Total costs	375 USD
Impact on return (RIY) per year	0,75 %

### Composition of costs

The table below shows:

- The impact each year of the different types of costs on the performance of the product at the end of the recommended holding period.
- What the different cost categories mean.

#### This table shows the impact on return per year

One-off costs	Entry costs	0,75 %	The impact of the costs you pay when entering your investment. The impact of the costs of exiting your investment when it matures.
	Exit costs	n.a.	
Ongoing costs	Portfolio transaction costs	0 %	The impact of the costs of us buying and selling underlying investments for the product. The impact of the costs that we take each year for managing your investments and the costs presented in Section II.
	Other ongoing costs	0 %	

## How long should I hold it and can I take money out early?

### Recommended holding period: 5 years

This product is designed for staying invested until the maturity date.

This product cannot be easily ended. This means it is difficult to estimate how much you would get if you end before maturity. You will either be unable to end early or you will have to pay high costs or make a large loss if you do so.

## How can I complain?

Any complaint regarding the product or the conduct of the manufacturer or persons within Nordea advising on, or selling the product can be submitted under the following website <https://www.nordea.fi/tietoa-nordeasta/tietoa-nordeasta/palveluasiamies.html>, in written form to Nordea Bank Abp, Palveluasiamies, 2219 Household, 00020 NORDEA or via email to [palveluasiamies@nordea.com](mailto:palveluasiamies@nordea.com).

## Other relevant information

The derivative master agreement governing the product is provided to you as separately agreed. Arrangements for mitigating credit risk may also be agreed between you and Nordea when required. The information contained in this Key Information Document does not constitute a recommendation to buy or sell the product and is no substitute for individual consultation with your bank or advisor. Nordea uses an independent external vendor to calculate the performance scenarios according to the methodology prescribed in the PRIIPs regulation and the supplementing regulatory technical standard. The methodology may cause the performance scenarios to be substantially more favourable (or less favourable) than the performance implied by Nordea's estimates, market consensus and implied market prices. Hence, Nordea's view is that an investment decision should not be based on the performance scenarios.
